

Leaf T116

Entry door with a Leaf T116 is made of profile 7 Series. Due to this fact they have good thermal-insulating and sound-proofing properties. The reinforcement is here used to make the construction more rigid and durable. Beside the profile, its hardware is not the least important component for comfortable operation of door, that's why you should pay a special attention to selection of hinges and locks.

Installation depth (width of door frame) – 70 mm

Width of glass unit – 24mm, 32mm
